

TECHNICAL MEMORANDUM

TO: Nanette Rogers, Town Administrator, Westford
FROM: Sai Kumar Sarepalli, P.E.; CCRPC
DATE: 08/16/2023
RE: Intersection Safety Analysis of Phelps Road, and Maple Tree Lane at Woods Hollow Road

Introduction

The Town of Westford requested the Chittenden County Regional Planning Commission (CCRPC) staff to evaluate existing traffic conditions, sight distance and safety concerns at two intersections along Woods Hollow Road at Phelps Road and Maple Tree Lane and provide recommendations for improving safety for all road users at the study intersections.

Existing Conditions

Maple Tree Lane and Woods Hollow Road are classified by the state as Class II Town Highways and functionally classified as Rural Minor Collector, whereas Phelps Road is classified as Class III Town Highway and functionally classified as a Local Road. The posted speed limit on these roads is 35 mph. Woods Hollow Road is a major commuter route traveling north-south connecting the Town of Essex and Westford. The CCRPC staff installed Automatic Traffic Recorders (ATRs) on Woods Hollow Road north of Manley Road to collect traffic volume and speed data. Data were collected between June 17, 2023 and June 23, 2023. Figure 1 shows the study area and ATR locations.

Speed and Volume Data

Table 1 below shows a summary of speed and volume data collected on Woods Hollow Road.

Table 1: Speed and Volume Data on Woods Hollow Road

| | Woods Hollow Road |
|---|--|
| 85 th Percentile Speed (mph) | 36 mph – Northbound 43 mph – Southbound |
| Average Speed | 30 mph – Northbound 38 mph - Southbound |
| Posted Speed Limit (mph) | 35 mph |
| Average Daily Traffic (ADT) | 501 vehicles per day |

Figure 1: Study Area and ATR Locations

Phelps Road and Woods Hollow Road Intersection

The intersection of Phelps Road and Woods Hollow Road is a T-intersection with STOP control on Phelps Road. The gravel roadway width for Phelps Road and Woods Hollow Road varies between 20 ft and 22 ft with narrow gravel shoulders. During the site visit, it was observed vehicles on the Phelps Road approach were stopping at the STOP sign and slowly proceeding into the intersection for a better view of oncoming traffic before making left-turn and right-turn maneuvers. Figures 2 and 3 show the existing conditions of the intersection.

Figure 2: Looking north, towards right, from Phelps Road

Figure 3: Looking south, towards left, from Phelps Road

Maple Tree Lane and Woods Hollow Road

The intersection of Maple Tree Lane and Woods Hollow Road is a T-intersection with STOP control on Maple Tree Lane. The gravel roadway width for Maple Tree Lane and Woods Hollow Road varies between 20 ft and 22 ft with narrow gravel shoulders. Similar to Phelps Road, vehicles on the Maple Tree Lane approach stopped at the STOP sign and slowly proceeded into the intersection for a better sight of oncoming traffic before turning on to Woods Hollow Road. Figures 4 and 5 show the existing conditions of the intersection.

Figure 4: Looking north, towards right, from Maple Tree Lane

Figure 5: Looking south, towards left, from Maple Tree Lane

Stopping Sight Distance

Stopping sight distance is the distance required based on a roadway's speed limit or design speed that enables drivers to perceive the presence of potential conflicting vehicles or roadway hazards. This distance is required for motorists to stop or adjust their speed, as appropriate, to avoid collision with roadway obstructions or entering traffic.

Intersection Sight Distance

Intersection sight distance is a clear sight distance provided for a stopped driver on a minor road, controlled by a STOP sign, to depart from the intersection safely and enter or cross the major road. Adequate intersection sight distance should be provided on all quadrants of an intersection for safety of all drivers traveling on major and minor roads.

A motorist approaching an intersection should be provided with a safe stopping sight distance to be able to see vehicles entering the intersection in sufficient time to react and come to a safe stop before reaching the intersection. A Policy on Geometric Design of Highways and Streets, commonly known as the Green Book, published by the American Association of State Highway and Transportation Officials (AASHTO), provides recommended intersection sight distances for STOP controlled intersection based on design speeds, perception reaction time and braking distance. Tables 2 and 3 show recommended intersection sight distance for motorists turning left and right from a STOP-controlled intersection, respectively.

Table 2: Intersection Sight Distance – Left Turn from STOP

| | | Intersection Sight Distance for Passenger Cards | |
|--------------------|------------------------------|---|-------------|
| Design Speed (mph) | Stopping Sight Distance (ft) | Calculated (ft) | Design (ft) |
| 15 | 80 | 165.4 | 170 |
| 20 | 115 | 220.5 | 225 |
| 25 | 155 | 275.6 | 280 |
| 30 | 200 | 330.8 | 335 |
| 35 | 250 | 385.9 | 390 |
| 40 | 305 | 441.0 | 445 |
| 45 | 360 | 496.1 | 500 |

Table 3: Intersection Sight Distance – Right Turn from STOP

| | | Intersection Sight Distance for Passenger Cards | |
|--------------------|------------------------------|---|-------------|
| Design Speed (mph) | Stopping Sight Distance (ft) | Calculated (ft) | Design (ft) |
| 15 | 80 | 143.3 | 145 |
| 20 | 115 | 191.1 | 195 |
| 25 | 155 | 238.9 | 240 |
| 30 | 200 | 286.7 | 290 |
| 35 | 250 | 334.4 | 335 |
| 40 | 305 | 382.2 | 385 |
| 45 | 360 | 430 | 430 |

Field Observations and Sight Distance Measurement

The CCRPC staff and interns conducted a reconnaissance field survey and measured intersection sight distance at both intersections of Phelps Road and Maple Tree Lane with Woods Hollow Road. Limited sight distance was observed in the field for vehicles turning left and right from Phelps Road and Maple Tree Lane which is a safety concern for vehicles traveling in all directions at these two intersections.

According to AASHTO's Green Book design guidelines, the departure sight distance for a left-turn maneuver from a STOP sign should be at least 390 ft, and for a right-turn maneuver the distance should be at least 335 ft for a 35 mph design speed. Figures 6 and 7 below show intersection sight triangles for

the intersections of Phelps Road and Wood Hollow Road, and Maple Tree Lane and Woods Hollow Road, respectively.

Figure 6: Sight Triangle legs at Phelps and Woods Hollow Road

Figure 7: Sight Triangle legs at Maple Tree Ln and Woods Hollow Road

From the field survey, the available clear sight distance of oncoming vehicles from left is 200 ft for the Phelps Road approach, and 225 ft for the Maple Treen Lane approach which is less than the recommended distance of 390 ft for turning left from the STOP sign. A clear sight distance of at least 335 ft should be available for the right-turning maneuver from the STOP sign. A clear sight distance of 400 ft is available from both Phelps Road and Maple Tree Lane approaches to view oncoming vehicles from right. Motorists stopped at the STOP signs at both intersections do not have adequate clear sight distance of oncoming vehicles from left to make a safe either left or right turning maneuver. As seen from Figures 2 through 5, the presence of vegetation, road vertical grade and geometry on the northbound approach obstruct the clear sight distance for motorists turning left and right from the STOP sign. As mentioned earlier, drivers at both intersections are slowly proceeding to the edge of pavement for a better view of oncoming traffic from left before entering the intersection.

Conclusion and Recommendations

It is evident from the sight triangle figures and field observations, shown above, that vehicles stopped at STOP sign at both study intersections do not have adequate clear sight distance of oncoming vehicles from left which can pose a safety hazard while making left-turn and right-turn maneuvers.

Based on the field survey, observations, and intersection sight distance evaluation, the following are the recommended mitigation measures to improve sight distance and safety of motorists in all travel directions at both intersections.

1. Remove, clear or trim vegetation along Woods Hollow Road to improve sight distance in both travel directions.
2. Install a Curve Ahead warning sign supplemented with a 20 mph advisory speed limit sign on the northbound approach (Woods Hollow Road) approximately 400 ft from the Phelps Road approach. See Figure 8 below for an example. The bottom of the advisory speed plaque should be at least 4 ft from the road surface.

Figure 8: Curve Ahead supplemented with a 20-mph advisory speed limit plaque

3. Install a Radar Speed feedback sign supplemented with a 20-mph advisory speed limit plaque on the northbound approach, Woods Hollow Road, approximately 300 ft from the Phelps Road approach.

4. Relocate the Intersection Ahead warning sign, see Figure 9, on Woods Hollow approximately 400 ft from the Maple Tree Lane intersection and increase the height of the sign for better visibility.

Figure 9: Existing Intersection Warning Sign

5. Install a supplemental street name “Maple Tree Lane” plaque on the Intersection Ahead warning sign, as shown below. The bottom of the street name plaque should be at least 5 ft from the road surface.

6. Install a Radar Speed Feedback Sign supplemented by a 20-mph advisory speed limit plaque on the northbound approach, Woods Hollow Road, at least 300 ft from Maple Tree Lane.

7. Actual sign placement and speed feedback sign locations should be surveyed and verified in the field.
8. Conduct an intersection realignment feasibility study to evaluate options like re-grading the northbound approaches of Woods Hollow Road, and/or raise the intersections to improve sight distances at both study intersections.
9. Monitor traffic volume on Woods Hollow Road, Phelps Road, and Maple Tree Lane periodically and reevaluate safety conditions as needed.

End of Memo
